Welcome to an additional supplement from the Technology Strategy Board (TSB) Knowledge Transfer Network and the Telecare Learning and Improvement Network.

Scroll through this supplement to the August 2013 Newsletter for a summary of journal articles covered in the TelecareLIN newsletter during the period January to June 2013. A full listing is followed by subjects that could be of interest to readers.

a) Full Listing in alphabetical order

"There's no cure for this condition": How physicians discuss advance care planning in heart failure
5 reasons why mobile technology needs clinical trials
A Comparison of Care at E-visits and Physician Office Visits for Sinusitis and Urinary Tract Infection
A Comparison of Energy Expenditure Estimation of Several Physical Activity Monitors
A Decision Support Model for Prescribing Internal Cardiac Defibrillators
A holistic framework to improve the uptake and impact of eHealth technologies
A Home Telehealth Heart Failure Management Program for Veterans Through Care Transitions
A Low-Cost Mobile Adaptive Tracking System for Chronic Pulmonary Patients in Home Environment
A Meta-Analysis of Web-Delivered Tailored Health Behavior Change Interventions
A mHealth cardiac rehabilitation exercise intervention: findings from content development studies
A New Dimension of Health Care: Systematic Review of the Uses, Benefits, and Limitations of Social Media for Health Communication
A passive positioning alarm used by persons with dementia and their spouses - a qualitative intervention study
A Pilot Study Evaluating Daily Physical Activity Before and After Cardiac Resynchronization Therapy
A pilot study of a novel home telemonitoring system for oncology patients receiving chemotherapy
A pilot study of a telehealth intervention for persons with spinal cord dysfunction
A Pilot Study of an mHealth Application for Healthcare Workers: Poor Uptake Despite High Reported Acceptability at a Rural South African Community-Based MDR-TB Treatment Program
A pilot study of the effectiveness of home teleconsultations in paediatric palliative care
A pilot test of a tailored mobile and web-based diabetes messaging system for adolescents
A pilot test of videoconferencing to improve access to a stroke risk-reduction programme for Veterans
A pilot trial of a speech pathology telehealth service for head and neck cancer patients
A pilot trial of the iPad tablet computer as a portable device for visual acuity testing
A plastic surgeon’s guide to applying smartphone technology in patient care
A Prospective Study of Nighttime Vital Sign Monitoring Frequency and Risk of Clinical Deterioration
A randomised controlled trial of an SMS-based mobile epilepsy education system
A randomised trial of telemedicine-based treatment versus conventional hospitalisation in patients with severe COPD and exacerbation “effect on self-reported outcome
A randomized clinical trial of a nurse telephone follow-up on paediatric tonsillectomy pain management and complications
A randomized clinical trial of a web-based tobacco cessation education program
A randomized clinical trial of the Health Evaluation and Referral Assistant (HERA): Research methods
A randomized controlled study about the use of eHealth in the home health care of premature infants
A randomized study of telephonic care support in populations at risk for musculoskeletal preference-sensitive surgeries
A Randomized Trial of Telemonitoring and Self-Care Education in Heart Failure Patients Following Home Care Discharge
A Reality Checkpoint for Mobile Health: Three Challenges to Overcome
A remote monitor embedded in insulin pen caps could help personalize diabetes treatment
A review on mHealth research in developing countries
A Smartphone-Based Intervention With Diaries and Therapist-Feedback to Reduce Catastrophizing and Increase Functioning in Women With Chronic Widespread Pain: Randomized Controlled Trial
A smartphone-supported weight loss program: design of the ENGAGED randomized controlled trial
A systematic review of evidence on the links between patient experience and clinical safety and effectiveness -- Doyle et al. 3 (1) -- BMJ Open
A systematic review of telemedicine services for residents in long term care facilities
A Systematic Review of Web-Based Interventions for Patient Empowerment and Physical Activity in Chronic Diseases: Relevance for Cancer Survivors
A Systematic Self-Certification Model for Mobile Medical Apps
A tailored, interactive health communication application for patients with type 2 diabetes: study protocol of a randomised controlled trial
A Telemedicine Cloud Solution Using Peer-to-Peer Connections with a Telephonic Stethoscope - Press Release - Digital Journal
A text message a day keeps the asthma attack away
A Text Messaging Intervention to Improve Heart Failure Self-Management After Hospital Discharge in a Largely African-American Population: Before-After Study
A three stage ontology-driven solution to provide personalized care to chronic patients at home
About half of the states are implementing patient-centered medical homes for their Medicaid populations
ABPM less acceptable to patients than home monitoring
Abstract of article: Healthcare information systems: a patient-user perspective
Acceptance of telecare for MS varied with computer experience, disease duration
Access to Primary Care and Visits to Emergency Departments in England: A Cross-Sectional, Population-Based Study
Accessibility from the patient perspective: comparison of primary healthcare evaluation instruments
Accuracy of Electronically Reported Meaningful Use® Clinical Quality Measures: A Cross-sectional Study
Achievement of Goals in U.S. Diabetes Care
Adam Steventon: Evaluating the Whole System Demonstrator trial
Adherence to a Smartphone Application for Weight Loss Compared to Website and Paper Diary: Pilot Randomized Controlled Trial
Advocacy of home telehealth care among consumers with chronic conditions
Agreement Between Telerehabilitation and Face-to-Face Clinical Outcome Assessments for Low Back Pain in Primary Care
AHRQ - Findings and Lessons From the Enabling Patient-Centered Care Through Health IT

AHRQ offers lessons and models from patient-centered IT pilots

AHRQ Report: Health IT Can Facilitate Patient-Centered Care

All in this together: the corporate capture of public health

Alzheimer’s & Dementia - Association of diabetes with amnestic and nonamnestic mild cognitive impairment

Ambient Assisted Living Devices Interoperability Based on OSGi and the X73 Standard

Ambulatory oncology nurses making the right call: assessment and education in telephone triage practices

An evaluation of a self-management package for people with diabetes at risk of chronic kidney disease

An evaluation of a web-based diabetes education program designed to enhance self-management among patients living with diabetes

An intervention to improve adherence and management of symptoms for patients prescribed oral chemotherapy agents: an exploratory study.

An open trial of self-help behaviours of clients with eating disorders in an online programme

An organisational analysis of the implementation of telecare and telehealth: the whole systems demonstrator

Applied Ergonomics - Advancing socio-technical systems thinking: A call for bravery

Artificial intelligence framework for simulating clinical decision-making: A Markov decision process approach

Artificial Intelligence in Medicine - Aggregating evidence about the positive and negative effects of treatments

Ask-Advise-Connect - A New Approach to Smoking Treatment Delivery in Health Care Settings

Assessing adolescent asthma symptoms and adherence using mobile phones

Assessing research impact in academic clinical medicine: a study using Research Excellence Framework pilot impact indicators

Assessment of Barriers to Improve Diabetes Management in Older Adults

Assistive technology and telecare Archives - Wellbeing and environments in dementia: a multidisciplinary approach

Association between depression and maintenance medication adherence among Medicare beneficiaries with chronic obstructive pulmonary disease

Association of Comorbidities With Home Care Service Utilization of Patients With Heart Failure While Receiving Telehealth

Association of Lifecourse Socioeconomic Status with Chronic Inflammation and Type 2 Diabetes Risk: The Whitehall II Prospective Cohort Study

Attitudes to Social Care for Older People in Northern Ireland. CARDI: Centre for Ageing Research and Development in Ireland

Avoidable Hospitalizations in Older Adults

Bad medicine: the way we manage diabetes

Barriers and Facilitators of Online Patient Portals to Personal Health Records Among Persons Living With HIV: Formative Research. Luque. JMIR Research Protocols

Beyond Virtual Inclusion - Communications Inclusion and Digital Divisions

Blood pressure, smoking and alcohol: The health risks with the biggest global burden

BMC Family Practice. Full text. Unlocking information for coordination of care in Australia: a qualitative study of information continuity in four primary health care models

BMJ Group blogs: BMJ » Blog Archive » David Kerr: Driving in the (near) future

BMJ Group blogs: BMJ » Blog Archive » Richard Vize: Andy Burnham’s plans signify profound changes in the way the NHS is structured (UK)

BMJ Group blogs: Computer-based Type 2 Diabetes self-management
BMJ Group blogs: The real world versus lifestyle change trials in diabetes
BMJ investigation finds GPs being forced to ration access to hospital care
Breathlessness and Skeletal Muscle Weak - PubMed Mobile
But obviously not for me: robots, laboratories and the defiant identity of elder test users
California will test new health-care model
Can a call service provide the same level of care as a hospital?
Can a multi-factorial assessment and interventional programme decrease inpatient falls in an elderly care ward?
Can a Website-Delivered Computer-Tailored Physical Activity Intervention Be Acceptable, Usable, and Effective for Older People?
Can England’s NHS Survive?
Can individualized weight monitoring using the HeartPhone algorithm improve sensitivity for clinical deterioration of heart failure?
Can interacting with avatars reduce depression?
Can Text Messages Reach the Parts Other Process Measures Cannot Reach: An Evaluation of a Behavior Change Intervention Delivered by Mobile Phone?
Can they hack it? Yes they can
Cardiac Rehabilitation: BEGINNING AT THE BEDSIDE
Cardiac resynchronization therapy: an update
Cardiovascular Effects of Intensive Lifestyle Intervention in Type 2 Diabetes
Cascading behaviour in complex socio-technical networks
Case finding for chronic obstructive pulmonary disease in primary care: a pilot randomised controlled trial
Challenges of a Mobile Application for Asthma and Allergic Rhinitis Patient Enablement
Changes in blood pressure in patients with hypertension in the context of delegated GP-home visits: a prospective implementation study
Changing color of antiepileptic pills raises risk of patients' non-adherence, study shows
Changing pill colour worsens adherence, new research suggests
Chronic care infrastructures and the home
Chronic disease, prevention policy, and the future of public health and primary care
Clinical course outcomes for store and forward teledermatology versus conventional consultation: a randomized trial
Clinical Outcome and Cost-Effectiveness of a Synchronous Telehealth Service for Seniors and Nonseniors with Cardiovascular Diseases: Quasi-Experimental Study
Clinical Psychology Review - Impact of support on the effectiveness of written cognitive behavioural self-help: A systematic review and meta-analysis of randomised controlled trials
Clinical usefulness and cost effectiveness of home blood pressure telemonitoring: meta-analysis of randomized controlled studies
Clinical utility of the chronic obstructive pulmonary disease knowledge questionnaire
Cochrane review finds no proved benefit in drug treatment for patients with mild hypertension
Code Blue for Paper and the Death of the Medical Journal
Cognitive dysfunction and self-care decision making in chronic heart failure: A review of the literature
Cognitive function and self-care management in older patients with heart failure
Combined Heart Rate- and Accelerometer-Assessed Physical Activity Energy Expenditure and Associations With Glucose Homeostasis Markers in a Population at High Risk of Developing Diabetes: The ADDITION-PRO Study
Community Health Workers and Mobile Technology: A Systematic Review of the Literature
Community-based intervention to improve dietary habits and promote physical activity among older adults: a cluster randomized trial
Comparison of prothrombin time (INR) results and main characteristics of patients on warfarin treatment in primary health care centers and anticoagulation clinics
Comparison of the information provided by electronic health records data and a population health survey to estimate prevalence of selected health conditions and multimorbidity
Comparison of traditional versus mobile app self-monitoring of physical activity and dietary intake among overweight adults participating in an mHealth weight loss program
Comparison of management and health outcomes in a prospective cohort study of 573 heart failure patients in Australia: does more equal less?
Computer templates in chronic disease management: ethnographic case study in general practice
Computer-based diabetes self-management interventions for adults with type 2 diabetes mellitus - The Cochrane Library
Computer-generated reminders delivered on paper to healthcare professionals; effects on professional practice and health care outcomes - The Cochrane Library - Arditi - Wiley Online Library
Conceptual Framework for Development of Comprehensive e-Health Evaluation Tool (abs)
Coordinated care can address disabled adults’ high rates of emergency department use
Coping and health-related quality of life in individuals with heart failure: An integrative review
Correlates of Health-Related Social Media Use Among Adults
Cost effectiveness of a computer-delivered intervention to improve HIV medication adherence
Cost effectiveness of telehealth for patients with long term conditions (Whole Systems Demonstrator telehealth questionnaire study): nested economic evaluation in a pragmatic, cluster randomised controlled trial - BMJ
Cost effectiveness of telehealth in the management of chronic conditions
Cost of behavioral interventions utilizing electronic drug monitoring for antiretroviral therapy adherence
Cost of healthcare in 5 years - under $1000 a person
Cost-effectiveness of a coronary heart disease secondary prevention program in patients with myocardial infarction: results from a randomised controlled trial (ProActive Heart)
Cost-Utility Analysis of the EVOLVO Study on Remote Monitoring for Heart Failure Patients With Implantable Defibrillators: Randomized Controlled Trial
Country actions to meet UN commitments on non-communicable diseases: a stepwise approach - The Lancet
Critical care patients have major health and financial problems 12 months after discharge, finds study
Cuts are putting quality of care at risk, say NHS managers - BMJ (UK)
Cyber nursing—Health ‘experts’ approaches in the post-modern era of virtual performances: An ethnography study
Death rates decline for advanced heart failure patients, but outcomes are still not ideal
Delivery of Evidence-Based Psychotherapy via Video Telehealth
Deployment of assistive living technology in a nursing home environment: methods and lessons learned
Depressive disorder in the last phase of life in patients with cardiovascular disease, cancer, and COPD: data from a 20-year follow-up period in general practice
Derivation and validation of QStroke score for predicting risk of ischaemic stroke in primary care and comparison with other risk scores: a prospective open cohort study - BMJ
Dermatologists express concern for mole diagnosing medical apps, citing poor results in testing
Design and pilot results of a mobile phone weight-loss application for women starting a meal replacement programme
Designing and Implementing an Innovative SMS-based alert system (RapidSMS-MCH) to monitor pregnancy and reduce maternal and child deaths in Rwanda
Developing an Online Health Intervention for Young Gay and Bisexual Men
Development and Testing of a Multidimensional iPhone Pain Assessment Application for Adolescents with Cancer
Development and Testing of a Short Form of the Patient Activation Measure
Development of a 5 year life expectancy index in older adults using predictive mining of electronic health record data
Development of a patient-centred care pathway across healthcare providers: a qualitative study
Development of a Screening and Brief Intervention and Referral for Treatment for ED Patients at Risk for Undiagnosed Hypertension: A Qualitative Study
Development of a web-based intervention for the indicated prevention of depression
Diabetes and risk of physical disability in adults: a systematic review and meta-analysis: The Lancet Diabetes & Endocrinology
Diabetes control in older people
Diabetes increases heart attack risk by 48%
Diagnostic Inaccuracy of Smartphone Applications for Melanoma Detection
Diet and physical activity in the self-management of type 2 diabetes: barriers and facilitators identified by patients and health professionals
Differences in Reach and Attrition Between Web-Based and Print-Delivered Tailored Interventions Among Adults over 50 Years of Age: Clustered Randomized Trial
Differences in the use and appreciation of a web-based or printed computer-tailored physical activity intervention for people aged over 50 years
dLife mHealth Survey: Tracking Blood Glucose With A Mobile App Can Lead To Weight Loss And Decreased A1C Levels
Do medical doctors respond to economic incentives?
Do Patients Like“ Good Care?
Does Providing Prescription Information or Services Improve Medication Adherence Among Patients Discharged From the Emergency Department? A Randomized Controlled Trial
Does quality affect patients’ choice of doctor? Evidence from the UK
Does telemonitoring in heart failure empower patients for self-care? A qualitative study
Domesticating and democratizing science: A geography of do-it-yourself biology
Dublin boys win Lego award for robot reminding people to take medicines
Each one-unit increase in BMI ups heart failure risk by 17%
Earlier Age of Dementia Onset and Shorter Survival Times in Dementia Patients With Diabetes
Early Results of the Meaningful Use Program for Electronic Health Records
Educational and motivational support service: a pilot study for mobile-phone-based interventions in patients with psoriasis
Effect of continuous glucose monitoring on hypoglycemia in type 1 diabetes
Effect of Home Blood Pressure Telemonitoring and Pharmacist Management on Blood Pressure Control: A Cluster Randomized Clinical Trial
Effect of Patient Activation on Self-Management in Patients With Heart Failure
Effect of Psychosocial Interventions on Quality of Life in Patients With Chronic Heart Failure: A Meta-analysis of Randomized Controlled Trials
Effect of Store and Forward Teledermatology on Quality of Life: A Randomized Controlled Trial
Effect of telecare on use of health and social care services: findings from the Whole Systems Demonstrator cluster randomised trial
Effectiveness of a Website and Telemonitoring in Patients With Heart Failure
Effectiveness of cell phones and mypyramidtracker.gov to estimate fruit and vegetable intake
Effectiveness of Community-Wide and Individual High-Risk Strategies to Prevent Diabetes: A Modelling Study
Effectiveness of PhysioDirect telephone assessment and advice services for patients with musculoskeletal problems: pragmatic randomised controlled trial BMJ
Effectiveness of Telephone-Based Counseling for Improving the Quality of Life Among Middle-Aged Women.

Effects of a web-based stroke education program on recurrence prevention behaviors among stroke patients: a pilot study

Effects of an internet support system to assist cancer patients in reducing symptom distress: a randomized controlled trial

Effects of self-management health information technology on glycaemic control for patients with diabetes: a meta-analysis of randomized controlled trials

Effects of type 2 diabetes behavioural telehealth interventions on glycaemic control and adherence: a systematic review

Effects of type 2 diabetes on 12-year cognitive change: results from the Maastricht Aging Study

Efficacy of multiparametric telemonitoring on respiratory outcomes in elderly people with COPD: a randomized controlled trial

Efficacy of simple home-based technologies combined with a monitoring assistive center in decreasing falls in a frail elderly population (results of the Esoppe study)

eHealth Literacy and Older Adults: A Review of Literature: Topics in Geriatric Rehabilitation

eHealth promotion and social innovation with youth: using social and visual media to engage diverse communities

Electronic Records Systems Have Not Reduced Health Costs, Report Says - NYTimes.com

Elehealth Problem-Solving Therapy for Depressed Low-Income Homebound Older Adults

Emerging concept: 'central benefit model' of exercise in falls prevention -- Liu-Ambrose et al. --

British Journal of Sports Medicine

England's national programme for IT

Entangled complexity: why complex interventions are just not complicated enough

Ethical considerations of clinical photography in an area of emerging technology and smartphones

Evaluating internet health resources in ear, nose, and throat surgery

Evaluating Self-Management Behaviors of Diabetes Patients in Telehealthcare Program

Evaluating the Translation Process of an Internet-Based Self-Help Intervention for Prevention of Depression: A Cost-Effectiveness Analysis

Evaluation of a Web-Based Program Promoting Healthy Eating and Physical Activity for Adolescents: Teen Choice: Food and Fitness

Evaluation of computer-tailored health education ('E-health4Uth') combined with personal counselling ('E-health4Uth + counselling') on adolescents' behaviours and mental health status: design of a three-armed cluster randomised controlled trial.

Evaluation of health alerts from an early illness warning system in independent living

Evidence lacking on mHealth effectiveness in poor countries

Experiences with using information and communication technology to build a multi-municipal support network for informal carers

Exploring telemonitoring and self-management by patients with chronic obstructive pulmonary disease: A qualitative study embedded in a randomized controlled trial

Factors affecting frequency of patient use of Internet-based telemedicine to manage cardiovascular disease risk

Factors affecting front line staff acceptance of telehealth technologies: a mixed-method systematic review

Factors influencing the adoption and implementation of teledentistry in the UK, with a focus on orthodontics

Factors influencing use of an e-health website in a community sample of older adults

Failure to Engage Hospitalized Elderly Patients and Their Families in Advance Care Planning

Falls in the elderly (Assessment of)

Features of effective computerised clinical decision support systems: meta-regression of 162 randomised trials. BMJ

August 2013 ALIP – Telecare Network Newsletter Supplement Page 7 of 24
Finding the missing millions - the impact of a locally enhanced service for COPD on current and projected rates of diagnosis: a population-based prevalence study using interrupted time series analysis.

Finding the patient in patient safety

Flexible polymer transistors with high pressure sensitivity for application in electronic skin and health monitoring

Fragmentation: a wicked problem with an integrated solution?

Frailty in elderly people: The Lancet

Frailty in patients affected by atrial fibrillation

From mobile mental health to mobile wellbeing: opportunities and challenges

From Nudging to Budging: Using Behavioural Economics to Inform Public Sector Policy

Full text A Systematic Review of Healthcare Applications for Smartphones

General Health Checks in Adults for Reducing Morbidity and Mortality From Disease

General health checks in adults for reducing morbidity and mortality from disease: Cochrane systematic review and meta-analysis. BMJ

Giving patients online records access ‘cuts appointment demand by 12%’ (UK)

Global Strategy for the Diagnosis, Management, and Prevention of Chronic Obstructive Pulmonary Disease

Glucose Control in Older Adults With Diabetes Mellitus—More Harm Than Good?

Glycemic Control Associated With Secure Patient-Provider Messaging Within a Shared Electronic Medical Record: A Longitudinal Analysis

Governing through Evidence: A Study of Technological Innovation in Health Care

Guided Self-Help Cognitive Behavioural Therapy for Depression in Primary Care: A Randomised Controlled Trial

Harnessing the cloud of patient experience: using social media to detect poor quality healthcare (abs)

Health & Place - Telehealth as peace of mind: embodiment, emotions and the home as the primary health space for people with chronic obstructive pulmonary disorder

Health behavior models in the age of mobile interventions: are our theories up to the task?

Health Information Technology in Screening and Treatment of Child Obesity: A Systematic Review.

Health News - Physiotherapy advice via telephone reduces waiting times and provides equally good results for patients' health

Health Professionals' Expectations Versus Experiences of Internet-Based Telemonitoring: Survey Among Heart Failure Clinics

Health transitions in recently widowed older women: a mixed methods study

Heart failure symptom measures: critical review

Heart failure symptom monitoring and response training

Heart failure therapy in patients with coronary artery disease.

Heart failure: clinical problem and management issues

Heavy mobile phone usage tied to poor fitness: study

Hispanic Migrant Farm Workers' Attitudes Toward Mobile Phone-Based Telehealth for Management of Chronic Health Conditions

Home Blood Pressure Monitoring: Take It to the Bank

HONEY: A Multimodality Fall Detection and Telecare System

Hospital readmissions not linked to mortality

How do we know whether medical apps work?

How Mobility, Apps and BYOD Will Transform Healthcare

How QOF is shaping primary care review consultations: a longitudinal qualitative study

Hypertension: How To Work With Patients To Get The Perfect Blood Pressure. (UK)

'I need her to be a doctor': patients' experiences of presenting health information from the internet in GP consultations
Identifying cognitive impairment in heart failure: A review of screening measures
Is a patient: show me the trial data
IMA Journal Club, Study Done to Assess Apple’s Facetime® in a Dermatology Practice
Impact of care management processes and integration of care on blood pressure control in diabetes
Impact of telemonitoring home care patients with heart failure or chronic lung disease from primary care on healthcare resource use (the TELBIL study randomised controlled trial).
Impacts of second-generation electronic prescriptions on the medication management process in primary care: A systematic review
Implementation of a telehealth programme for patients with severe chronic obstructive pulmonary disease treated with long-term oxygen therapy
Implementation of self management support for long term conditions in routine primary care settings: cluster randomised controlled trial
Incidence and predictors of heart failure hospitalization and death in permanent pacemaker patients: a single-centre experience over medium-term follow-up.
Income inequality and 30 day outcomes after acute myocardial infarction, heart failure, and pneumonia: retrospective cohort study | BMJ
Increased Use of Twitter at a Medical Conference: A Report and a Review of the Educational Opportunities
Increasing Physical Activity With Mobile Devices: A Meta-Analysis
Increasing utilization of internet-based resources following efforts to promote evidence-based medicine: a national study in Taiwan
Information about assisted dying: an evaluation of web-based information resources
Information and Communication Technology to Support Self-Management of Patients with Mild Acquired Cognitive Impairments: Systematic Review
Information Overload and Missed Test Results in Electronic Health Record Based Settings
In-home monitoring of older adults with vision impairment: exploring patients’, caregivers’ and professionals’ views
Integrating Self Blood Pressure Monitoring Into the Routine Management of Uncontrolled Hypertension: Translating Evidence to Practice - Angell - 2013 - The Journal of Clinical Hypertension - Wiley Online Library
Interests and Perspectives of Care Organizations and Patients Regarding an Effectiveness Trial of a Multifactorial Fall Injuries Prevention Strategy for Non-Institutionalized Older Persons
Internal Versus External Motivation in Referral of Primary Care Patients with Depression to an Internet Support Group: Randomized Controlled Trial
Internet-enabled pulmonary rehabilitation and diabetes education in group settings at home: a preliminary study of patient acceptability
iPad-Assisted Measurements of Duration Estimation in Psychiatric Patients and Healthy Control Subjects
Is "teach-back" associated with knowledge retention and hospital readmission in hospitalized heart failure patients?
Is case management effective in reducing the risk of unplanned hospital admissions for older people? A systematic review and meta-analysis
Is secondary preventive care improving? Observational study of 10-year trends in emergency admissions for conditions amenable to ambulatory care -- Bardsley et al. 3 (1) -- BMJ Open
Is telephone review feasible and potentially effective in low vision services?
Iterative Evaluation of a Web-Based Health Information Resource
Towards an ontology for data quality in integrated chronic disease management: A realist review of the literature
JAMA study shows melanoma detecting apps can cause harm, but should not be dismissed
Journal Club for Iphone- Medical Apps Peer Reviewed - The Medical App Journal
Journal of the International Society for Telemedicine and eHealth
Knowing, caring, and telehealth technology: "going the distance" in nursing practice
Knowledge mobilisation in healthcare organisations: Synthesising evidence and theory using perspectives of organisational form, resource based view of the firm and critical theory
Labour’s plans for health and social care would not require more top-down NHS changes, says Burnham - BMJ
Lanthier - Internal Medicine Practical Guide (Medical App)
Life with chronic obstructive pulmonary disease: striving for 'controlled co-existence'
Long-Term Engagement With a Mobile Self-Management System for People With Type 2 Diabetes
Managing hypertension in urban underserved subjects using telemedicine—a clinical trial
Mapping mHealth Research: A Decade of Evolution
Measuring Actual eHealth Literacy Among Patients With Rheumatic Diseases: a Qualitative Analysis of Problems Encountered Using Health 1.0 and Health 2.0 Applications
Medical applications for pharmacists using mobile devices
mHealth points to missing evidence for mobile health
mHealth for Midwives: A Call to Action
mHealth in Health Information Delivery: The Indian Scenario
Midlife stroke risk and cognitive decline: A 10-year follow-up of the Whitehall II cohort study
Misdiagnosis Poses Significant Potential for Harm
Misleading Health-Related Information Promoted Through Video-Based Social Media: Anorexia on YouTube
Mobile Applications and Internet-based Approaches for Supporting Non-professional Caregivers: A Systematic Review - NCBI Bookshelf
Mobile Clinic Saves Money, Improves Health For Low-Income Patients - CommonHealth
Mobile Health (mHealth) Approaches and Lessons for Increased Performance and Retention of Community Health Workers in Low- and Middle-Income Countries: A Review
Mobile Health Applications for the Most Prevalent Conditions by the World Health Organization: Review and Analysis
Mobile Health Services for Patients with Chronic Diseases: A Systematic literature Review
Mobile Health Technology Evaluation - The mHealth Evidence Workshop
Mobile Phone Applications for the Care and Prevention of HIV and Other Sexually Transmitted Diseases: A Review
Mobile phone interventions to increase physical activity and reduce weight: a systematic review
Mobile phone text message intervention to reduce binge drinking among young adults: study protocol for a randomized controlled trial.
Mobile phone-based interventions for smoking cessation
Momentary Assessment of Social Context and Glucose Monitoring Adherence in Adolescents With Type 1 Diabetes
Monetary Costs of Dementia in the United States
More Than One-Third of US Individuals Use the Internet to Self-diagnose
Mortality by Level of Emphysema and Airway Wall Thickness
Most innovations are not advances: innovation + evaluation = progress
Multi-component weight-loss interventions for people with cardiovascular disease and/or type 2 diabetes mellitus: a systematic review.
Multilevel Growth Curve Analyses of Treatment Effects of a Web-Based Intervention for Stress Reduction: Randomized Controlled Trial
Multimorbidity, polypharmacy, referrals, and adverse drug events: are we doing things well?
New-Onset Diabetes Mellitus in Elderly Subjects: Association between HbA1c levels, mortality, and coronary revascularization
Non-motor symptoms of Parkinson’s disease: the patient’s perspective.
Non-response in telephone surveys of COPD patients does not introduce bias
Older adults’ satisfaction with a medication dispensing device in home care
Older Patients’ Experiences of Heart Failure-An Integrative Literature Review
On the remarkable persistence of asymmetry in doctor/patient interaction: a critical review
Online disease management of diabetes: engaging and motivating patients online with enhanced resources-diabetes (EMPOWER-D), a randomized controlled trial.
Online doctor consults can be as effective as office visits
Online Screening and Referral for Postpartum Depression: An Exploratory Study
Online Social Networking for HIV Education and Prevention: A Mixed-Methods Analysis
Only one in four people with uncontrolled epilepsy sees a specialist  BMJ
Opportunities and Challenges for Smartphone Applications in Supporting Health Behavior Change: Qualitative Study
Over-claiming the evidence for telehealth and telecare? - BMJ
PAL-MED CONNECT(®): A Telephone Consultation Hotline for Palliative Medicine Questions.
Patient access to complex chronic disease records on the Internet
Patient and carer experience of obtaining regular prescribed medication for chronic disease in the English National Health Service: a qualitative study
Patient and service user engagement in research: a systematic review and synthesized framework
Patient Experiences With Full Electronic Access to Health Records and Clinical Notes Through the My HealtheVet Personal Health Record Pilot: Qualitative Study
Patient powered health  BMJ
Patient safety education - A description and evaluation of an international, interdisciplinary e-learning programme
Patient Satisfaction and Patient-Centered Care Necessary but Not Equal
Patient-centred healthcare, social media and the internet: the perfect storm?
Patients’ Use of Self-Monitored Readings for Managing Everyday Life with COPD: A Qualitative Study
Patterns of Comorbidity in Older Adults with Heart Failure: The Cardiovascular Research Network PRESERVE Study
Pedometer program helps motivate participants to sit less, move more
Personalised care for patients with type 2 diabetes reduces complications, study finds  BMJ
Physical Activity Text Messaging Interventions in Adults: A Systematic Review
Physical and cognitive functioning of people older than 90 years: a comparison of two Danish cohorts born 10 years apart : The Lancet
Portsmouth Case Study
Post-disaster Gulf Coast Recovery Using Telehealth
Post-Hospital Syndrome - An Acquired, Transient Condition of Generalized Risk - NEJM
Potential benefits of well engaged patients® are akin to those from a blockbuster drug, say experts BMJ
Potential of telemedicine to provide acute medical care for adults in senior living communities
Practical aspects of telehealth: financial considerations
Preamesthesia screening phone messages and rate of return based on the primary language of patient
Predicting costs of care in heart failure patients
Primary Care Physician Shortages Could Be Eliminated Through Use Of Teams, Nonphysicians, And Electronic Communication
Primary Results of the HABIT Trial (Heart Failure Assessment With BNP in the Home)
Privacy policies for health social networking sites
Promoting networks between evidence-based medicine and values-based medicine in continuing medical education
Protocol: Telehealth Solutions for Remote Healthcare Delivery
Pulmonary rehab at home guided by telemonitoring and access to healthcare facilities for respiratory complications in patients with neuromuscular disease
Quantifying Short-Term Dynamics of Parkinson's Disease Using Self-Reported Symptom Data From an Internet Social Network
