Click "like" to change your behavior: a mixed methods study of college students' exposure to and engagement with Facebook content designed for weight loss
Comparative Analysis of Online Health Queries Originating From Personal Computers and Smart Devices on a Consumer Health Information Portal
Cost-effectiveness of telecare for people with social care needs: the Whole Systems Demonstrator cluster randomised trial
Debriefing for technology-enhanced simulation: a systematic review and meta-analysis
Developing and testing a computerized decision support system for nurse-to-patient assignment: a multimethod study
Do physical activity and dietary smartphone applications incorporate evidence-based behaviour change techniques?
E-counseling as an emerging preventive strategy for hypertension
Effect of medications with anti-cholinergic properties on cognitive function, delirium, physical function and mortality: a systematic review
Effect of telehealth on glycaemic control: analysis of patients with type 2 diabetes in the Whole Systems Demonstrator cluster randomised trial
Effectiveness of a smartphone application to promote physical activity in primary care: the SMART MOVE randomised controlled trial
Effects of Home-Based Primary Care on Medicare Costs in High-Risk Elders
eHealth and mHealth initiatives in Bangladesh: A scoping study
Emerald Insight Journal of Health Organization and Management Digital support for medication administration: A means for reaching the goal of providing good care?
Evidence based medicine: a movement in crisis?
Examining the use of telehealth in community nursing: identifying the factors affecting frontline staff acceptance and telehealth adoption - Taylor - 2014 - Journal of Advanced Nursing - Wiley Online Library
Experiences of front-line health professionals in the delivery of telehealth: a qualitative study
Factors affecting self-care in elderly patients with hypertension in Korea
FDA Regulation of Mobile Health Technologies - NEJM
Feasibility, acceptability and potential effectiveness of a mobile health (mHealth) weight management programme for New Zealand adults
Full text Understanding the acceptability of e-mental health - attitudes and expectations towards computerised self-help treatments for mental health problems
Home based telemedicine intervention for patients with uncontrolled hypertension: – a real life - non-randomized study
ICT supported healthy lifestyle interventions: design lessons
Impact of community based, specialist palliative care teams on hospitalisations and emergency department visits late in life and hospital deaths: a pooled analysis
Impact of electronic health records on the patient experience in a hospital setting
Implementation of the Re-Engineered Discharge (RED) toolkit to decrease all-cause readmission rates at a rural community hospital
Installing Telecare, Installing Users
Instruments to assess patient satisfaction after teleconsultation and triage: a systematic review
Integrated telehealth care for chronic illness and depression in geriatric home care patients: the Integrated Telehealth Education and Activation of Mood (I-TEAM) study
Intensive Care Unit Telemedicine Program
Is the quality of data in an electronic medical record sufficient for assessing the quality of primary care?
JMIR-E-collection 'Participatory Medicine & E-Patients'
JMU-E-collection 'Quality Evaluation and Descriptive Analysis of Multiple Existing Mobile Apps'
Linguistic characteristics of patients with bulimic symptomatology in an online post-treatment program: an exploratory study
MACHINES THAT GO 'PING': MEDICAL TECHNOLOGY AND HEALTH EXPENDITURES IN OECD COUNTRIES
